

# CLASSIC HEATPRESS CL 2717

INDONESIAGRAPHIC  
Your Graphic Art Partner

Mesin Pemanas CLASSIC  
Ideal untuk Press Kain  
Roll to roll dan Lembaran.

Kecepatan Press Maksimal  
sampai dengan

**80m/jam\***

\*untuk Drum Silinder 200mm, Kain Sifon Dan Kain Tipis.

## DIGITAL TEXTILE PRINTER DYE - SUBLIMATION

EPSON SURECOLOR SC-F9430H (6 WARNA)

EPSON SURECOLOR SC-F9430 (4 WARNA)

KECEPATAN CETAK HINGGA

**60** M<sup>2</sup>/JAM  
PASS 2

## SPESIFIKASI:

| CLASSIC              | CL 2717                 |
|----------------------|-------------------------|
| Diameter Drum        | 200                     |
| Power                | 12kw                    |
| Voltage              | 380v / 3phase           |
| Heating Method       | Oil Based               |
| Maks. Lebar Transfer | 1650mm                  |
| Lebar Blanket        | 1700mm                  |
| Lebar Roll Mesin     | 1860mm                  |
| Area Meja Kerja      | L1200mm x P1800mm       |
| Kecepatan Maksimum   | 50 - 100 m/j            |
| Ukuran Packing       | 2680mm x 950mm x 1480mm |
| Berat                | 800Kg                   |

- Multifunctional for roll to roll & piece to piece printing.
- Auto-unwind/rewind device with speed-adjustable Motor & Air Shaft, Easy Operation & Higher Efficiency.
- Pneumatic Pressure System to Ensure Excellent Color Transfer Effect & Higher Production Efficiency.
- Blanket Guiding System: Automatic Device for Blanket Deviation & Correction to Improve Printing Quality & Labor-saving.
- Automatic Take-up Device for Finished Fabric/Time and Space-saving.
- Shutdown Alarm System to Avoid the Blanket from Being Damage.
- Intelligent Controller Panel, to Accurately Control the Machine to Shut Down and Cut Off Power When Heater Temperature Drop Down Below 80 Degrees at Off-work Time. Extend Service Life of Blankets & Conducting Oil.
- Air-shaft for Sublimation Paper & Protection Paper to Increase Tension & Flatness of Paper to Avoid Wrinkle.
- Air-shaft for Collecting Finished Paper & Air-shaft for Protection Paper with Brake Torque and Speed-regulating Motor to Make all Paper for Winding More Neatly & Tightly.
